STREAMLINE

Waterfed Poles & Brushes

The range now consists of glass fibre and full carbon fibre telescopic poles giving different expense, rigidity and strength accordingly.

OVA8®

Pages 4 - 13

The **STREAMLINE® OVA8®** carbon fibre telescopic poles are designed in an 'oval' profile section, reducing the wear of the sections from the pole clamps.

ECOLITE™

Pages 14 - 15

Improved light-weight glass fibre telescopic pole

ECOLINE™

Pages 16 - 17

The ECOLINE™ glass fibre range offer best value for money, whilst providing a professional pole for the domesticand contract window cleaner alike.

ULTRALITE™

Pages 18 - 19

Improved light-weight glass fibre telescopic pole clam

STREAMLINE®

OVA8®

Eliminating the spin, once and for all

The **STREAMLINE® OVA8®** carbon fibre telescopic poles are designed with 'oval' profile sections, allowing for zero pole spin and reducing the wear of the sections from the pole clamps. Available in a number of different sizes, with numerous adapters and pole extensions, making the **STREAMLINE® OVA8®** one of the best waterfed poles on the market to date!

100% CARBON FIBRE

Quick Release System

Superior Clamps

Zero Spin

Why use the STREAMLINE® OVA8® pole?

- Its innovative design ensures that the dreaded pole spin associated with worn waterfed pole sections is a thing of the past.

- Superb pole section clamps ensure the pole sections stay where you want them.

- 100% carbon ensuring it's as light as possible and as strong as possible.

- Its 2 flat sides make the pole easier to hold for long periods of time.

- Available in multiple sizes to suit customers' needs.

- AVAILABLE NOW - a range of accessories to ensure that the **STREAMLINE® OVA8®** is as versatile as possible.

STREAMLINE®
OVA8®
With Univalves

Holding any item in the hand for long periods can be painful. The OVA8 design combines two flat sides. These sit more comfortably in an operator's hand and allow the tips of their fingers to sit on the flat edge.

The two flat sides of the OVA8 telescopic pole add more stability and therefore more control for the operator, a huge "safety" plus. Any experienced operative will tell you how dangerous and annoying a spinning pole section is.

The benefits of a univalve are that, when you are at a distance from the van, the Univalve prevents you from going back to the van to turn the water off. Therefore, the univalve saves you, the user time and effort which then becomes more time efficient.

OVA8® Accessories

A growing range of STREAMLINE® OVA8® accessories making this water fed pole one of the most versatile poles on the market.

New for 2022

OVA8® Roof Scraper

A lightweight and compact roof scraper attachment for the OVA8® pole. The design incorporates a quick-change head with a load and lock feature. This feature allows the user to swap out the blades when changing to a new roof tile type or if the blades have worn down. Made from stainless-steel, the roof scraper and blades are rust resistant and extremely durable. Consisting of a variety of different blades to suit the most common roof tiles, the kit allows you to scrape moss and debris off a roof with ease.

STREAMLINE® ULTRALITE™

The ULTRALITE™ modular pole system probably the lightest poles ever with each section weighing only 200 grams.

Modular design allows you to add or remove sections to suit the required working height. The lightness of the pole enables prolonged working time without fatigue, especially when large areas of glass are to be cleaned.

This pole is not for the heavy handed, but if you are looking for a lightweight modular pole with exceptional capabilities, look no further. Each section is tapered to allow a push fit assembly for extending. This also allows them to be stored in side each other for protection when not in use. Each pole includes our unique 12″ lightweight gooseneck with 12″ double trim brush (10″ and 14″ double trim brush available as an option).

STREAMLINE®

Hi-Lo Brushes

The STREAMLINE® brush has been designed to include:

• A light weight design
• Versatile jet styles and positioning
• Bristles that retain their shape and provide longevity

This has been achieved thanks to lighter stocks, monofilament soft bristles with low moisture retention and high memory reflex...meaning they will return to their original shape and provide the longevity required.

With the quick-lock jets in pencil and fan spray options; and various jet positionings offered on the brushes, these are a versatile and innovative addition to the range.

Temperature rating in excess of 50°C, these brushes will perform in hot water applications too.

Vikan Waterfed Brushes

If it doesn't say Vikan, it's not Vikan...

All brush blocks are made of polypropylene and the PBT filaments are fixed with stainless steel staples. The diameter of the holes in the brush blocks are accurately reduced to the filament bundle size. All brush sockets are integral and have a machined thread to secure the brush to the angle adapter.

Traditional Non-scratch Pencil Jets

PART NO	ITEM
NJ2	2.0mm Orifice fitted standard
BHR05	3.0mm Orifice optional

Reduce your rinse time with Fanjets
