Traditional Cleaning Tools

LEWI™ enables cleaning tasks to be completed safely and quickly because everything is compatible with everything in the range

LEWI™

LEWI™ enables cleaning tasks to be completed safely and quickly as all products within the range are compatible with one another. Demand value...insist on **LEWI™**. Another great brand from the **STREAMLINE®** range.

Approved Quality range of window cleaning tools

LEWI™ wash coverings come with press studs which have double-locked ends. Coverings available in a variety of sizes, namely 10", 14" and 18" (25, 35 and 45cm).

WHITE STAR is a conventional sleeve and suitable for daily work.

BLUE STAR is made from PES and special microfibres and has therefore very good water absorption. The run-in pad strip allows easy removal of small smudges.

PAD STRIP is equipped with a non-scratching pad strip on one side for coarse dirt. On the other side is normal push.

All coverings are washable at 60°C. With the **LEWI™** T-bar made from aluminium, an ideal connection between the telescopic pole and the T-bar is made. The flexible T-bar is continuously adjustable and can be fixed by a screw. The plastic T-bar is made from dimensionally stable plastics and equipped with water wells.

Safety from the ground

LEWI™ have equipped telescopic poles with a new union nut, a new anti-trap protection and new cone in order to obtain a firm connection. The external section is rolled, structured and welded providing high stability. The inner tube is equipped with a sliding block. Therefore distorting is impossible even if pressure is applied when the tool is attached. Working is therefore safe and fast.

Telescopic Pole Aluminium 2 Section

with end cone, ensures a firm connection

PART NO	ITEM
