

HEATWAVE™

THERMO 2 Water Heaters

It is a fact that hot water cleans better than cold water, so why not improve your cleaning results with a Heatwave™ water heater?

Heatwave™ water heater systems use diesel from either the vehicle's fuel tank or a separate tank that can be filled with red diesel for economy. The greatest benefit of this superb kit to the cleaning contractor is reduced cleaning times, as hot water cuts through dirt, snail trails, fly spots, spider webs etc. far easier than if using cold water.

Benefits of the Heatwave™ Water heaters include:

- Safe to use, diesel-fired water heater which can draw fuel from the vehicles tank
- Built in thermostat
- Compact design for maximum space saving
- Robust powder coated cabinet for long life and consistent better finish
- Zinc primer coat to help reduce rust and stop flaking
- Frostat controller with digital reading to prevent the system from freezing and to keep you working
- Can be retrofitted to any pure water system
