

### ULTRALITE™ Modular Carbon Fibre pole system... Probably the lightest poles ever, with sections weighing as little as 200 grams.

Modular design allows you to add or remove sections to suit the required working height.

The lightness of the pole enables prolonged working time without fatigue, especially when large areas of glass are to be cleaned.

This pole is not for the heavy handed, but if you are looking for a lightweight modular pole with exceptional capabilities, look no further. Each section is tapered to allow a push fit assembly for extending. This also allows them to be stored in side each other for protection when not in use.

#### Gooseneck and Double trim brush.

2" lightweight gooseneck and 12" double-trim brush with 2mm pencil jets fitted. Fanjets and other brushes available as options.

#### Pole Protection

Rubber Base Cap and Tuff Ring on each section to protect the pole ends. Plastic storage tube to keep them safe when not in use.

#### Including LITE-5® yellow tubing

LITE-5® yellow tubing which clips neatly into the base cap of each section allowing the tubing to be kept tidy on the outside of the pole.
