

## Finding it difficult to pressure wash at higher levels?

The High Pressure Tripod system allows you to pressure wash at height from the safety of the ground, improving the stability of the telescopic lance and increasing the accuracy of the clean. The tripod system eliminates the strain on the operators arms, legs and back, allowing less fatigue and a faster cleaning cycle.

With kit options including the HX4, HX5, HX6 and HX7 HIGHLINE™ Giraffe high pressure telescopic poles, the tripod system can reach up to 42ft (12mtr) effectively.

### What are the tripod features?:

- 1x Strong frame made from marine grade stainless steel, can be folded for ease of storage when not in use.
- 3x Heavy duty locking castor wheels allows a single operator manoeuvre whilst cleaning at height.
- 1x Heavy duty castor wheel in centre of stainless frame, to assist moving the tripod when folded for storage.
- 1x Bespoke built clamp for supporting telescopic pole whilst extended at height, allowing the operator to position at different angles whilst cleaning.
- 1x High pressure handle/lever for operator to adjust or shut off water pressure.
- Storage hooks for holding high pressure hose, keeping hose free from the operator.

# HIGHLINE™

## High Pressure Tripod

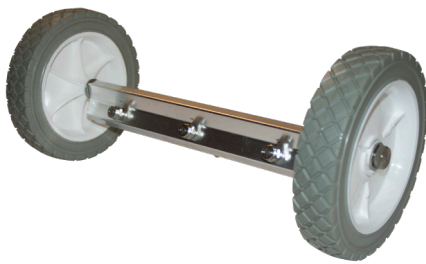

### What's included with the tripod system?:

- 1x HIGHLINE™**  
High pressure telescopic pole of your choice – ranging from 25ft / 8mtr – 42ft / 12mtr, there is a range of carbon fibre poles available with the tripod system.

- 1x HP-SBF36-MD**  
2-nozzle medium scrubbing brush with 14inch / 360mm spraying width – a double trim scrubbing brush complete with 2x high pressure nozzles allows the operator to scrub down stubborn dirt whilst rinsing.

- 1x HP-GP2100505**  
3-nozzle wall crawler with 12inch / 300mm spraying width – a heavy duty aluminium manifold with non-marking wheels allows the operator to glide up and down the surface for quick and effective cleaning.

- 1x HP-NP035**  
5-nozzle pack with different spray sizes for various applications.

- 1x HP-HSC300**  
2-nozzle hard surface cleaner with 12inch / 300mm spraying width – a ABS plastic surface cleaner with brush skirt allows the operator to clean sensitive areas with minimal over spray.

- 1x** Heavy duty wooden storage box, complete with compartments for accessories and telescopic pole.
