

The Ferret Wifi

Inspect with the Ferret

Multipurpose Wireless Inspection Camera and Cable Pulling Tool

The multi award-winning Ferret WiFi is a smart multipurpose wireless rechargeable inspection camera and cable pulling tool. It has a built in WiFi hotspot and is designed to provide faster and easier close up visual inspections when working in dark, confined and hard to reach spaces. With 6 main functions it is an ideal tool for any electrician, trade or DIY enthusiast to inspect & locate, reach & retrieve, data capture & report.

The Ferret is small enough to drop in your pocket or tool pouch, and lets you quickly get eyes where you need them most. The high resolution 720p wireless camera with built in adjustable bright white LEDs, streams a clear image directly to your Apple or Android device even in full darkness. The easy to use free App lets you record photo or video directly to your smart device which you can use to send to customers or help with reporting when doing inspections. The digital zoom function brings you even closer to what you're looking at.

Key Features

- Wireless and rechargeable with a built-in WiFi hotspot
- Adjustable bright LEDs for better visibility in dark hard to reach locations
- Free easy to use App allowing you to record photos and videos direct to your smart device
- Get a closer look with the Digital zoom function
- Find, hook and pull in cable faster and easier using the robust hook attachment (gooseneck, rod/ hook/ magnet included to enhance functionality)
- Extend the Ferret's reach up to 12m using a variety of different rods or poles
- Work safer and smarter - reduce the need to always use a ladder or enter dark damp crawl spaces
- The Ferret's unique shape makes it stand out from all other inspection cameras.
