

**Due to its compact size and the fact all components are housed within the tank footprint, the ECOSTREAM™ takes up little room, even in smaller vans, allowing space for other equipment.**

The ECOSTREAM™ range of tank systems represent excellent value for money and can be fixed into vehicles permanently without the need of a stainless steel frame to do so. This allows significant savings to be made over against traditional systems, without compromising on the professional image that window cleaners always strive for. These tanks are constructed as water delivery systems, baffled to restrict water movement in transit and contain a lithium ion battery which can be easily removed to recharge.

### The kit Includes:

- 1 x STREAMLINE® SFC16 Digital Controller with battery voltage level
- 1 x STREAMFLO® Pump 12v 100PSI / 4.5LPM c/w Inline Filter
- 1 x STREAMLINE® Lithium-ion compact removable battery with USB port to charge your phone (8 hour continuous run time / 5 hours charge time)
- 1 x Fixed hose reel with 50m of 6mm STREAMLINE® hose and microbore couplings
- 1 x Crash-tested z-profile securing flange
