

# Van Mounted Systems

[www.streamline.systems](http://www.streamline.systems)

# Vehicle Package Solutions

Here at **STREAMLINE**®, we try and simplify your cleaning tasks as much as possible, giving you the option of cold and hot water systems to provide you with high-quality cleaning equipment to fulfil your needs. All of our tanks are baffled to restrict water movement in transit.

## Contents

### ***SMARTANK***

**Pages 4 - 9**

The **SMARTANK**® is a very compact system designed for efficiency. Various pump and filter combinations are available.

### ***COMBI***

**Pages 10 - 11**

Its compact design makes this unique product suitable for smaller van installations. With ingenuity and innovation combined into one system, the **COMBI**™ 325 is the first of its kind.

### ***ECOSTREAM***

**Pages 12 - 15**

The **ECOSTREAM**™ range of tank systems represent excellent value for money as they can be fixed into vehicles permanently without the need of a stainless steel frame to do so.

### **STREAMLINE**® Water Filtration Tanks

**Pages 16 - 19**

**STREAMLINE**® water filtration systems are designed to be used for window cleaning, solar panel cleaning, boat cleaning etc. where a spot-free finish is essential. To achieve this, the system has a series of filters to produce pure water with a reading of 0 ppm. However, the filters require maintenance from time to time to maintain optimum efficiency.

### ***HEATWAVE***

**Pages 20 - 25**

**HEATWAVE**™ water heater systems use diesel from either the vehicle's fuel tank or a separate tank that can be filled with red diesel for economy. The greatest benefit of this superb kit to the cleaning contractor is reduced cleaning times, as hot water cuts through dirt, snail trails, fly spots, spider webs etc. far easier than using cold water.

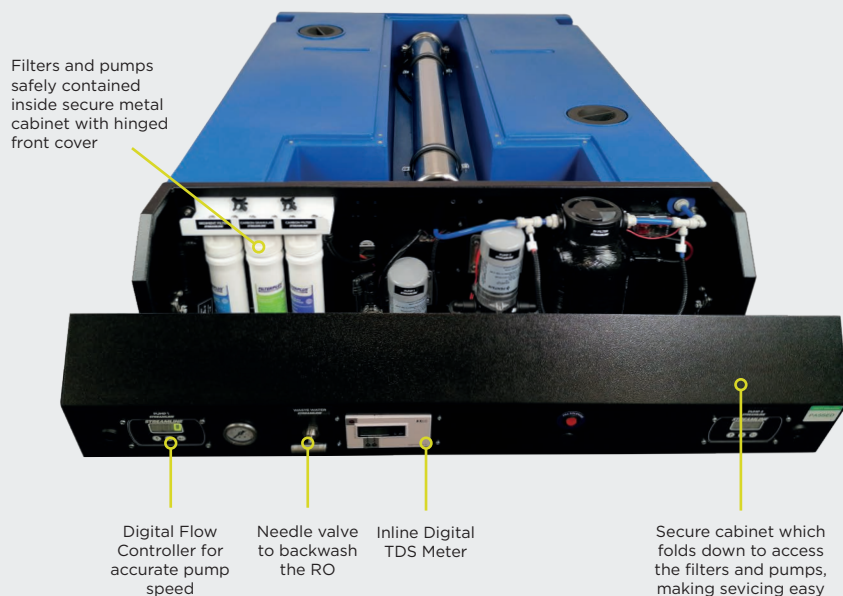

The **SMARTANK®** is a very compact system designed for efficiency. Various pump and filter combinations are available and can be offered as single or twin user options.

Being modular in design, these tanks can be fixed into vehicles utilising a metal flange, as opposed to traditional systems which use whole metal frames. With the equipment cabinet mounted at the front of the tank, at the door opening, operation has never been easier ... and with pumps, controllers and filters easily accessible, via the opening of the cabinet, maintenance and filter changes are simple and quickly achieved.

All tanks are baffled to restrict water movement in transit. With a height of less than 400mm these tanks offer safe, low centre of gravity van systems, while taking up minimal van space. With these low level tanks and by installing a false floor, the van load area can still be utilised for a multitude of purposes and transit of other needed equipment. Various pump and filter combinations are available. Alternatively, the tank can be used simply for water delivery only.

## Features

- **SMARTANK®** system offers low centre of gravity and a safe means of water transport.
- Flat tank design with a false floor (able to hold up to 250 kg) maximises van load area usage.
- Pumps run on 12 volt power, making them safe, quiet running and low cost to maintain.
- Flow controllers reduce water usage to a bare minimum.
- **SMARTANK®** system presents a professional image to your clients.
- Waterfed poles with brush head options eliminate the need for steps / ladders. Utilising a waterfed system can reduce cleaning time by more than half, increasing operator efficiencies.
- Available in 400, and 650 litre options

The **STREAMLINE® SMARTANK®** has been crash tested at the test centre of Horiba Mira, who are an independent automotive engineering consultancy.

The vehicle was fitted with a **SMARTANK®** 650 system, which was filled with water to its maximum capacity. The vehicle was then towed on a rail system at a speed of 30 miles per hour, into a solid concrete block, assimilating a head on collision.

The vehicle reached its maximum speed within two seconds and was guided into its obstacle. On impact, we saw the effects of the water tank rupturing and spilling the contents, mostly, out the back of the vehicle.

**Prebuilt and plumbed kit ready for installation.**

**Can be permanently or temporarily installed into a van.**

This new SMARTANK® design features a coated galvanised skid for the tank and offering you the option of either a 450ltr or 600ltr tank. One of the skid's advantages is that it contains forklift holes, for allowing users to forklift the SMARTANK® into their vans making it a totally portable independent system.

The SMARTANK® is delivered as a pre-assembled and plumbed kit that is ready to use, this allows the Smarttank skids to be put permanently or temporarily in a van, depending on the needs of the users.

### Features

- Slots for Forklifting
- Plenty of mounting holes
- Single or double user
- Secondary floor available (with all the features)
- Can mount hose reels on the floor

# NEW COMBI™ 325

Its compact design makes this unique product suitable for smaller van installations. With ingenuity and innovation combined into one system, the **COMBI™ 325** is the first of its kind.

Designed to either incorporate our **STREAMFLO®** 25-litre trolley system as a power unit or supplied as a 5-stage RODI filtration unit with lithium-ion battery technology, the design is totally unique to the window cleaning market.

Park our **STREAMFLO®** 25ltr trolley into the tank recess and use the trolley's pump and filter to deliver pure water from the tank.

Alternatively the **COMBI™ 325** tank can be supplied fully kitted with RODI and twin pump and controller configuration.

Either way, the **COMBI™ 325** provides a safe and professional image to your van, and maximises van space.

An optional 17-litre solution tank is available if required.

## Features

- Bespoke tank with baffles and Z-flange designed for van installations
- Unique concept of utilizing **STREAMFLO®** 25 trolley to power delivery of pure water
- Alternatively fitted with RODI and twin pump and controller configuration
- Hose reel with 100-metres of hose

### RODI version has the following additional features:

- Rechargeable lithium-ion batteries
- Twin pumps and digital V16 controllers
- Prefilters and twin membranes with flushing tap for efficient pure water production
- Inline dual TDS meter

It doesn't cost much to have a professional image

The ECOSTREAM™ range of tank systems represent excellent value for money as they are modular in design and can be fixed into vehicles permanently without the need of a stainless steel frame to do so. This allows significant savings to be made over traditional systems, without compromising on the professional image that window cleaners always strive for.

All tanks are baffled to restrict water movement in transit. The tanks also allow for pump, controller, filter and hose reel components to be fitted directly to them, ensuring best use of the compact designs and maximising van space.

There are packages designed to suit every need from straight forward water delivery units, i.e. pump and controller only, to demineralising and reverse osmosis systems or a combination of both, depending on customers' requirements.

Added to this comprehensive offering is a range of hose reel options to make the ECOSTREAM™ Tank Systems probably the most versatile and cost effective van mounted systems on the market today!

New for 2022

The ECOSTREAM™ 375Ltr is ideal for the smaller domestic van and vehicles. This ECOSTREAM™ 375Ltr takes up minimal internal vehicle space. Even in smaller vehicles, these tanks components are located inside the tank footprint, this, however, provides you space for additional equipment. The tanks are baffled to limit water movement while in transport. As a compact construct, the tanks are equipped with a pump, controller, filter, and hose reel, resulting in a nice and tidy finish while also maximising your vehicle space.

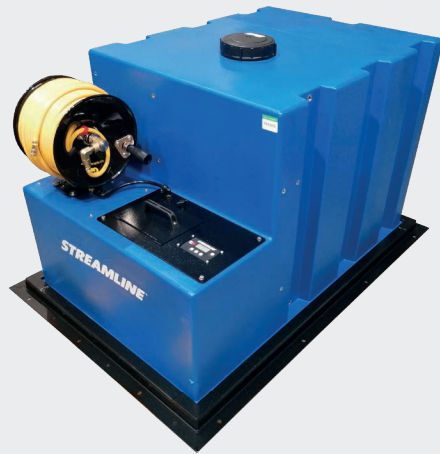

The ECOSTREAM™ 375Ltr tank with either the 50-mtr hose reel or the 100-mtr hose reel are the two primary options for you to consider.

### Features

- 375 litre baffled tank.
- All components housed neatly on the tank
- Single **STREAMFLO**® 100 PSI pump with **STREAMLINE**® digital controller
- Robust metal hose reel with lock mechanism
- 1 x **STREAMLINE**® SFC16 Digital Controller with battery voltage level
- 1 x **STREAMFLO**® Pump 12v 100PSI /4.5LPM c/w Inline Filter
- 1 x **STREAMLINE**® Lithium-ion compact removable battery with USB port to charge your phone (7-8 hour continuous run time / 5 hours charge time)
- 1 x Fixed hose reel with 50m of 6mm **STREAMLINE**® hose and microbore couplings or 100m hose.
- 1 x Crash-tested z-profile securing flange

## ECOSTREAM™ 500L

# **STREAMLINE** **HEATWAVE™**

## Quality components in a robust powder coated steel cabinet.

**HEATWAVE™** water heater systems use diesel from either the vehicle's fuel tank or a separate tank that can be filled with red diesel for economy. The greatest benefit of this superb kit to the cleaning contractor is reduced cleaning times, as hot water cuts through dirt, snail trails, fly spots, spider webs etc. far easier than using cold water.

It is a fact that hot water cleans better than cold water, so why not improve your cleaning results with a **HEATWAVE™** water heater? The greatest benefit of this superb kit to the cleaning contractor is reduced cleaning times, as hot water cuts through dirt, snail trails, fly spots, spider webs etc. far easier than if using cold water.

- Safe to use, diesel-fired water heater which can draw fuel from the vehicles tank
- Built in thermostat
- Compact design for maximum space saving
- Robust powder coated cabinet for long life and no rusting
- Froststat controller with digital reading to prevent the system from freezing and to keep you working
- Can be retrofitted to any pure water system

Hot Water System 9 kW Single  
& Double Operator Burner

THERMO2-S  
THERMO2-D

HEATWAVE™ water heater systems use diesel from either the vehicle's fuel tank or a separate remote tank that can be filled with red diesel for economy.

Benefits of the HEATWAVE™ water heaters include:

- Safe to use, diesel-fired water heater which can draw fuel from the tank
- Built in thermostat
- Compact design for maximum space saving
- Frostat controller with digital reading to prevent the system from freezing and to keep you working
- Can be retrofitted to any pure water system.
- Powder coated steel cabinet

Specifications

- 9 kW Diesel Burner
- Fuel Consumption - Approx 1.1 l/h
- Single or double operator use
