

This free-standing RO unit has a fully incorporated RO set up with a large filter capacity which present to you, one of the easiest ways to filter all the chemicals within the water, bringing you pure water on demand.

This RO Unit has a waste adjustment valve which allows the operator to adjust the pure water ratio as required.

An optional DI filter vessel can be easily be added on to the unit, to provide a final polish if required. The RO unit is fully automatic allowing for flushing and maintenance of the unit and providing a highly efficient pure water system.

The RO unit has a stainless steel support frame to miniise rust in wet enviroments.
