

Due to its compact size and the fact all components are housed within the tank footprint, the ECOSTREAM™ takes up little room, even in smaller vans, allowing space for other equipment. Supplied ready for use / easy installation

The Ecostream™ range of tank systems represent excellent value for money and can be fixed into vehicles permanently without the need of a stainless steel frame to do so. This allows significant savings to be made over against traditional systems, without compromising on the professional image that window cleaners always strive for. These tanks are constructed as water delivery systems, or DI filtration baffled to restrict water movement in transit and contain a lithium ion battery which can be easily removed to recharge. (No need of complex split charge required)

Features

- 2 Operator
- 700Ltr baffled tank
- All components house neatly on the tank
- 2 X Streamline SFC16 Digital controller with battery voltage level
- 2x Streamline® Lithium-Ion compact removable battery with USB ports to charge your phone
- Up to 8 hours continuous run time / 5 hour Charge time
- 1 x Fixed hose reel with 100mtr of 6mm Streamline® Hose
- Crash tested z-profile securing flange
